Profile

Full-Stack Developer with 1.5 years of experience building and maintaining web applications using React, .NET/C#, Python, REST APIs, SQL, and Git. Experienced in both frontend UI development and backend architecture, with a strong focus on product quality, user experience, and iterative development. Comfortable working independently, making technical decisions, and collaborating closely with cross-functional teams. Motivated by building products from scratch and eager to contribute to app development in a fast-paced startup environment.

Education

Integrated Master / Department of Informatics and Computer Engineering University of West Attica

Athens, Greece | September 2019 – September 2025

Completed a 5-year integrated Master's degree specializing in Software and Information Systems. Coursework included software engineering, databases, algorithms, and application development. Thesis: Implementing LLMs on local environments and fine-tuning for Greek legislation, using HuggingFace, Unsloth, Ollama.

Exchange Semester – Higher Engineering Institute of Coimbra

Coimbra, Portugal | September 2024 – January 2025

Studied abroad for one semester, collaborating with international students in English and gaining experience in a different academic and cultural environment.

Work Experience

Junior Software Developer – Qubiteq, Athens

Athens | April 2023 – August 2024

- Developed and maintained both backend and frontend features for the International Waterski & Wakeboard Federation web platform using ASP.NET MVC, C#, JavaScript, and React.
- Implemented frontend UI enhancements and fixes in React, improving the overall user experience and product quality.
- Improved SQL queries and stored procedures, contributing to better app performance and reliability.
- Handled customer support tickets, troubleshooting production issues and collaborating with client-side PMs to ensure high code quality and fast resolution.
- Contributed to CI/CD pipelines and iterative deployment workflows using Git and Azure Pipelines.

Projects

Freelance Software Developer – Visitor Management System, KEP Ithaca

Remote | September 2023 – January 2024

- Co-developed a full visitor management application from scratch for a public service center, taking ownership of both product decisions and technical implementation.
- Designed and built the backend architecture using Python Flask, SQLAlchemy, and RESTful APIs, ensuring clean API design and maintainability.

- Built the complete frontend in React, including reusable UI components, data flows, and a user-centered interface.
- Implemented JWT authentication and integrated hardware devices (printers, monitors, tablets), bridging software and physical product needs.
- Worked under government specifications with full autonomy on tech stack decision demonstrating ability to build independently and iterate quickly.

StocksFinder – Portfolio and stock information Web App

Full-Stack Web Application | 2025-2026

- Built a full-stack stock portfolio app where users can register, search stocks, manage a personal portfolio, and leave public comments on individual stock, with plans to expand features.
- Developed a RESTful API with .NET Core and PostgreSQL handling authentication, portfolio CRUD operations, and a commenting system
- Containerized the backend with Docker and deployed to a VPS with automated CI/CD via GitHub webhooks.
- Deployed the React frontend on Vercel with continuous deployment from GitHub.

Technical Skills

Languages & Frameworks: C#, Python, JavaScript, Java, React, ASP.NET, Flask

Frontend & App Development: React, HTML/CSS

Backend & APIs: REST API design, ASP.NET MVC, Python Flask, SQLAlchemy, JWT authentication

Databases: SQL Server, MySQL, PostgreSQL

Tools & DevOps: Git, Azure Pipelines (CI/CD), Docker, SSH

Languages

English – C2 Fluent | Greek – Native

Interests

Beach volleyball · Hiking · Bouldering · Snowboarding · Exploring nature & cultures
